

2025 IT Consulting Checklist:

Evaluate Your Business's IT Readiness

Is your business ready for the tech challenges and opportunities of 2025? Use this free checklist from Able Admins to assess your IT infrastructure, identify gaps, and plan for success. Check each item that your business has in place, and note areas needing improvement. Ready to transform your IT? Contact us for a free consultation!

1. Operational Efficiency

Streamline your workflows to save time and boost productivity.

- ☐ **Updated Software:** Are all your business applications (e.g., CRM, email, collaboration tools) running the latest versions to ensure performance and security?
- ☐ **Cloud Collaboration Tools:** Do you use cloud-based platforms like Microsoft 365 or Google Workspace to enable real-time teamwork?
- ☐ **Process Automation:** Have you automated repetitive tasks (e.g., invoicing, data entry) to reduce manual work?
- ☐ **Hardware Inventory:** Have you assessed your hardware (computers, servers) to identify outdated devices that slow operations?

Notes: If you're missing any of these, our IT consultants can recommend tools to cut project turnaround times by up to 30%.

2. Cybersecurity

Protect your business from rising cyber threats in 2025.

- ☐ **Security Audits:** Have you conducted a security audit in the past 6 months to identify vulnerabilities?
- ☐ **Multi-Factor Authentication (MFA):** Do all critical systems (e.g., email, cloud storage) require MFA for access?
- ☐ **Data Encryption:** Are sensitive data (e.g., customer info, financial records) encrypted both in transit and at rest?
- ☐ **Employee Training:** Have your staff been trained on cybersecurity best practices, like spotting phishing emails?

Notes: A secure IT environment builds customer trust. We can help implement robust defenses like zero-trust security.

3. Innovation and Technology Adoption

Stay competitive by embracing 2025's top tech trends.

- ☐ **AI Integration:** Are you exploring AI tools (e.g., predictive analytics, chatbots) to enhance decision-making or customer service?
- ☐ **Cloud Infrastructure:** Have you migrated key systems to scalable cloud platforms like AWS or Azure for flexibility?
- ☐ **Emerging Tech Plan:** Do you have a strategy to adopt trends like edge computing or IoT for your industry?

Notes: Our consultants can guide you in adopting cutting-edge solutions to position your business as an industry leader.

4. Scalability and Future-Proofing

Ensure your IT supports growth and adapts to change.

- ☐ **Network Capacity:** Can your network handle increased users or devices without slowdowns?
- ☐ **Backup and Recovery:** Do you have a tested backup plan (e.g., cloud and on-premises) to prevent data loss?
- ☐ **Compliance Check:** Are your systems compliant with 2025 regulations (e.g., GDPR, CCPA, HIPAA)?
- ☐ **IT Budget:** Have you allocated funds for future IT upgrades, like cloud services or new hardware?

Notes: Scalable IT is key to growth. We can design a roadmap to keep your systems future-ready.
